TANK THE SLIM
V-FORCE

INTRODUCING 900 MHz POWER TO ENTRY SERVERS

280R!

V880!

WARNING!
SUN INTERNAL CONFIDENTIAL
FOR SUN CHANNEL PARTNERS,
SUN SALES REPRESENTATIVES,
SUN SYSTEMS ENGINEERS

THIS IS THE SECOND IN A SERIES OF COMIC BOOKS DESIGNED TO PROVIDE PERTINENT INFORMATION ON SUN PRODUCTS. THE INFORMATION PROVIDED WITHIN IS INTENDED TO EDUCATE/TRAIN SUN FIELD MARKETING, SUN CHANNEL PARTNERS, AND SUN SYSTEM ENGINEERS ON THE SUN FIRE™ V880 AND SUN FIRE™ 280R APPLICATIONS, ATTRIBUTES, COMPETITION, AND KEY COMPETITIVE ISSUES. ONCE YOU READ THIS COMIC BOOK, GO TO [HTTP://WWW.SUN-VBOTS.COM/VOL2](http://www.sun-vbots.com/vol2) AND TAKE THE ONLINE QUIZ. IF YOU PASS, YOU'LL BE SENT A V-BOT COLLECTIBLE ITEM. IF YOU DON'T PASS, STUDY UP, AND TAKE IT AGAIN UNTIL YOU DO.*

— JEFFREY GREENWALD, VSP MARKETING, PHONE: 650-786-6713 (x86713), E-MAIL: JEFFREY.GREENWALD@SUN.COM

YOU SURE WE'VE SEEN THE LAST OF THAT PEA BRAIN, DR. TABULATION?

SURE. I SENT HIM AND HIS MOUTH-BREATHING GOONS BACK TO THE REPAIR SHOP.

YEAH, WELL, HE KNOWS BETTER THAN TO MESS WITH ME AND THE V880s.

SUN INTERNAL CONFIDENTIAL FOR SUN CHANNEL PARTNERS, SUN SALES REPRESENTATIVES, SUN SYSTEMS ENGINEERS

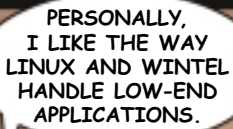

WE'RE ALL MOVING TO A NEW PLATFORM, MY FRIEND. OUR PLAN CALLS FOR LINUX AND WINTEL SERVERS.

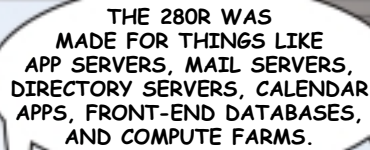

BET LEE'S TRYING TO COVER UP ALL THE UNRESOLVED PROBLEMS IN HIS OLD SYSTEM.

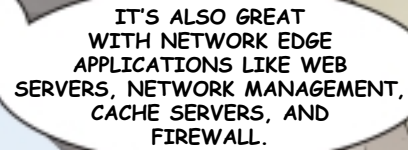

EVER TRY THE 280R? 4U HIGH WITH 2 ULTRASPARC™ III PROCESSORS. UPGRADES EASILY. CHANGE A FEW BOXES AND SWAP OUT SOME PROCESSORS AND WE'LL RAMP UP OUR CAPACITY. ONLY THE BOTTOM LINE WILL KNOW WE'VE MADE A CHANGE.

PERSONALLY, I LIKE THE WAY LINUX AND WINTEL HANDLE LOW-END APPLICATIONS.

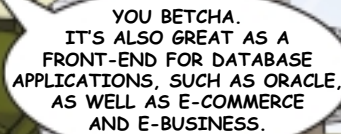

THE 280R WAS MADE FOR THINGS LIKE APP SERVERS, MAIL SERVERS, DIRECTORY SERVERS, CALENDAR APPS, FRONT-END DATABASES, AND COMPUTE FARMS.

IT'S ALSO GREAT WITH NETWORK EDGE APPLICATIONS LIKE WEB SERVERS, NETWORK MANAGEMENT, CACHE SERVERS, AND FIREWALL.

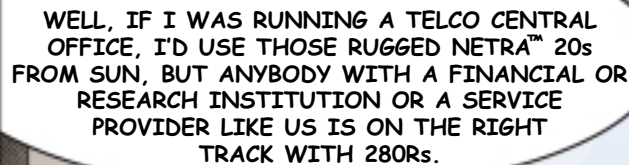

BUT IS IT ANY GOOD WITH E-MAIL?

YOU BETCHA. IT'S ALSO GREAT AS A FRONT-END FOR DATABASE APPLICATIONS, SUCH AS ORACLE, AS WELL AS E-COMMERCE AND E-BUSINESS.

WHAT ISN'T IT PERFECT FOR?

WELL, IF I WAS RUNNING A TELCO CENTRAL OFFICE, I'D USE THOSE RUGGED NETRA™ 20s FROM SUN, BUT ANYBODY WITH A FINANCIAL OR RESEARCH INSTITUTION OR A SERVICE PROVIDER LIKE US IS ON THE RIGHT TRACK WITH 280rs.

MR. KIRBY,
TANK IS HERE
TO SEE YOU.

TANK OF THE
V-BOTS?

GLAD YOU COULD
MAKE IT.

MY NEW ASSOCIATE SEEMS TO
THINK SUN'S THE ANSWER
FOR EVERYTHING.

WELL,
PUTTING MODESTY
ASIDE FOR A
MOMENT...

...SUN IS KNOWN FOR ITS
THOUGHT LEADERSHIP AND
PRODUCT EXECUTION.

LISTEN.
I WANT TO UPGRADE TO
SOMETHING THAT GIVES US
MORE PERFORMANCE.

LIKE WHAT?

WELL, YOU KNOW: HUP, KLOMPAK, ITM,
DULL. NOTHING WRONG WITH
THEM, IS THERE?

HEY,
WHAT'S THAT?

A DEVICE
THAT ALLOWS ME TO
DOWNLOAD WHAT I CAN SEE WITH
MY X-RAY VISION AND HEAR
WITH MY SUPER HEARING.
TAKE A LOOK.

SEE WHAT'S HAPPENING ACROSS THE STREET AT SUPPLESYSTEMS. SEE HOW OTHER SERVERS ARE REALLY TREATING THEM. MY LITTLE BROTHER, SLIM, HAS HIS HANDS FULL.

WHAT ARE THOSE PINT-SIZED ZAMBONIS?

CARNIBYTES...

THEY GOBBLE UP THE COMPANY'S VALUE AND RESOURCES.

WHERE DID THEY CRAWL OUT OF?

THEY'RE HIDDEN INSIDE EACH MACHINE. CARNIBYTES WASTE CYCLES THROUGH STEEP LEARNING CURVES, PROPRIETARY SOFTWARE, AND TENUOUS COMPATIBILITY. IT STINKS. WHAT'S WORSE IS THAT GOOD FOLKS GET SEDUCED BY SPECS AND BLINDED TO THE TRANSITION COSTS OF A NEW PLATFORM.

ITM'S ALWAYS BEEN GOOD ABOUT SETTING ME UP WITH NEW EQUIPMENT EVERY TIME I'VE NEEDED TO GROW.

AND CHARGING YOU UP THE WAZOO...

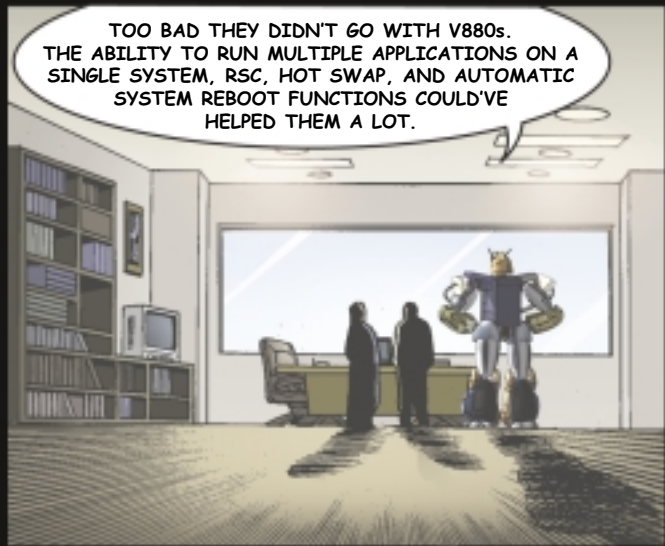

...THE COMPETITION'S OS IS PROPRIETARY AND RUNS ONLY WITH SOFTWARE/APPLICATIONS THAT ARE COMPATIBLE. THEY CAN ONLY START OVER WITH A NEW OS.

GEEZ-O-MIGHTY!

THEY'RE ENSLAVED WITH NO FREEDOM IN SIGHT. SLIM ON IT.

POOR WALDOES, THEY NEED TO REDUCE THOSE IT DEPARTMENT COSTS.

TOO BAD THEY DIDN'T GO WITH V880s. THE ABILITY TO RUN MULTIPLE APPLICATIONS ON A SINGLE SYSTEM, RSC, HOT SWAP, AND AUTOMATIC SYSTEM REBOOT FUNCTIONS COULD'VE HELPED THEM A LOT.

TRASH TALK. I'VE SEEN ENOUGH!

LEE, YOU HAVE THE SAME PROBLEM, JUST ON A DIFFERENT SCALE.

SIR!
IT'S THE DATA CENTER.
WE'RE BEING ATTACKED
BY THUGS LED BY
A BRAIN!!

DR. T!

TABULATION!

KRAKOOOM!

YOU CAN PUT THAT BACK IN THE TRUCK, MAC.

THAT'S A BRAND NEW ITM 8-WAY SYSTEM.

FORGET IT. THE V880 IS LESS EXPENSIVE AND HAS BETTER PERFORMANCE CHARACTERISTICS.

YOU'LL NEVER MATCH THE INTEL PENTIUM III-BASED WINTEL SERVERS.

THINK AGAIN, DR. BRAINLESS. WE DO MATCH THEM DOLLAR FOR DOLLAR AND WE HAVE SUN'S SPARC/SOLARIS™ RELIABILITY, AVAILABILITY, AND SECURITY.

NO WAY YOUR SCALABILITY IS AS GOOD.

RIGHT. IT'S BETTER! PLUS YOU'VE GOT NO EXPENSIVE RECOMPILATION OF SYSTEM AND...

...APPLICATION SOFTWARE WHEN YOU'RE READY TO UPGRADE OR EXPAND.

FFZATTTTT !!

MEANWHILE AT SUPPLESYSTEMS, SLIM HAS HIS HANDS FULL BATTLING THE CARNIBYTES.

THE SUN™ FIREPLANE INTERCONNECT OFFERS BALANCED THROUGHPUT ON I/O AND CPU CYCLES.

WE THOUGHT 6 GIGABYTES ON INTEL-BASED SYSTEMS WOULD BE PLENTY.

YOU CALL THAT MEMORY? THE 280R OFFERS 8 GIGABYTES OF MEMORY...

KROOM!

...AND BECAUSE SOLARIS IS SO EFFICIENT, IT'S ALL USABLE. AND THE 280R COMES WITH 8 MEGABYTES OF CACHE—16 TIMES AS MUCH AS THOSE OTHER SYSTEMS.

THAX!!!

WHAT ABOUT APPLICATION AVAILABILITY?

SOLARIS OS RUNS ALL APPLICATIONS.

SCREEE!

WE GIVE YOU 12,000+ APPLICATIONS TO CHOOSE FROM!

BACK AT
MULTIFLEX, THE
BATTLE RAGES...

TPC-C BENCHMARK
RATINGS SAY WE OUT-
PERFORM YOU.

GET REAL.
NOBODY RUNS TPC-C IN
THEIR BUSINESS. THEY RUN
APPLICATIONS AND WE SIMPLY
RUN BETTER. OUR TESTS
MEASURE...

KADOOM!!!

...THE COMBINATION
OF PROCESSOR SPEED, I/O
BUS SPEED, DISK SPEED,
AND MORE.

WELL,
SO, YOU'LL
NEVER
MATCH...

...A PC
SERVER FOR
CLUSTERING
BENEFITS.

WRONG AGAIN,
DR. FRANKENBRAIN!
NOT ONLY DOES SOLARIS
HAVE STRONG CLUSTERING
CAPABILITIES, IT HAS
TRUE SCALABILITY...

...RESULTING IN HIGHER
AVAILABILITY LEVELS AT A LOWER COST
FOR SOLARIS APPLICATIONS THAN ONE
RUNNING UNDER WINDOWS NT 4.0
OR WINDOWS 2000.

SHAZAT!

JZZZ

DON'T FORGET ABOUT RSC. RSC—REMOTE SYSTEM CONTROL. YOU GET REMOTE POWER ON AND POWER OFF.

YOU CAN MONITOR THE TEMPERATURE OF DIFFERENT COMPONENTS, INCLUDING THE SYSTEM BOARD.

YOU CAN EVEN GAIN ACCESS THROUGH YOUR MODEM, SERIAL PORT, OR YOUR NETWORK, CAN'T YOU?

IF YOU'VE GOT THE 280R OR THE V880 YOU CAN, BUT NOT HIM. HE GOT DULL. HE GOT HUP. HE GOT IMPTELL.

HE GOT FLATLINED!

WANT TO TALK MULTIPLE PROCESSORS?

THIS OPERA ISN'T OVER, WONDERBOY.

IT'S YOUR CURTAIN CALL. I WANT TO REPLACE SOME OF MY SMALLER MACHINES, SLIM.

RIGHT AWAY. THE 280Rs WILL BE THE PERFECT UPGRADE.

I MIGHT BE IN THE MARKET FOR A V880 OR TWO.

YOU GOT 'EM!

THE LICENSE FEE FOR SOLARIS OS GONNA COST US A LOT?

IT'S INCLUDED AT NO CHARGE. SOLARIS WILL KEEP US TOGETHER NOW AND INTO THE FUTURE.

THE LAST CARNIBYTE...

SUN SERVERS MATERIALIZE. THE MERGER IS COMPLETE, MULTIFLEX UNITED BY SOLARIS OS.

STAN, MY MAN. I OWE YOU.

TIME TO SAY
"ADIOS,
CHIMICHANGA!"

WE'RE GOING
OUT TO FIND
ITM PROFESSIONAL
SERVICES TO
HELP US!

I'LL GET YOU,
MY PRETTIES, AND
YOUR LITTLE
OS, TOO!

CARNIBYTES, HUH?
WOW.
THE FORCES OF GOOD
CAN NEVER REST.

HEY,
DID I EVER TELL
YOU ABOUT THE NEXT
PRODUCT WE'RE
WORKING ON?

TEST QUESTIONS

1. COMPARED TO INTEL 8-WAY SYSTEMS, THE V880 IS:
 - A. CONSIDERABLY MORE EXPENSIVE
 - B. LESS EXPENSIVE, AND HAS BETTER PERFORMANCE CHARACTERISTICS
 - C. BUILT ON NEW AND UNTESTED 64-BIT TECHNOLOGY
2. BECAUSE THE V880 UTILIZES SCALABLE SPARC/SOLARIS TECHNOLOGY:
 - A. NO EXPENSIVE RECOMPILATION OF SYSTEM AND/OR APPLICATION SOFTWARE IS REQUIRED WHEN IT IS TIME TO UPGRADE OR EXPAND
 - B. ITS REAL ABILITY TO SCALE IS DEPENDENT ON INTEL'S CHIP TECHNOLOGY ROADMAP OR MICROSOFT'S LATEST RELEASES OF FIXES TO ITS DIFFERENT OPERATING SYSTEMS
 - C. YOU CAN EXPECT TO INCUR THE SAME COSTS AS THOSE YOU WOULD EXPERIENCE WHEN SCALING A LINUX SOLUTION BEYOND A 4-WAY SYSTEM
3. A KEY FEATURE OF REMOTE SYSTEM CONTROL (RSC) IN BOTH V880 AND 280R IS:
 - A. THE ABILITY TO READ AN LED PANEL ON THE REAR OF THE UNIT
 - B. THE ABILITY TO MONITOR AND CONTROL THE SYSTEM WHILE NOT ON THE PREMISES
 - C. THE ABILITY TO QUICKLY AND EASILY ATTACH NETWORK CABLES TO THE BACKPLANE
4. A FULLY POPULATED V880 CAN HOLD:
 - A. EIGHT (8) CPUs
 - B. FOUR (4) CPUs
 - C. TWO (2) CPUs
5. THE V880 ALLOWS IT DEPARTMENTS TO REDUCE OVERALL COSTS BY:
 - A. ITS ABILITY TO RUN MULTIPLE APPLICATIONS ON A SINGLE SYSTEM
 - B. THE COMBINATION OF ITS RSC, HOT SWAP, AND AUTOMATIC SYSTEM REBOOT (ASR)
 - C. ALL OF THE ABOVE
6. DOES CLUSTERING THE V880 HAVE THE SAME BENEFITS AS CLUSTERING ANY PC SERVER?
 - A. SOLARIS HAS STRONGER CLUSTERING CAPABILITIES, WHICH RESULT IN HIGHER LEVELS OF AVAILABILITY FOR SOLARIS APPLICATIONS THAN THOSE RUNNING UNDER EITHER WINDOWS NT 4.0 OR WINDOWS 2000
 - B. THE V880 HAS NO SUPPORT FOR CLUSTERING
 - C. IT IS THE SAME
7. THE LICENSE FEE FOR SOLARIS ON THE V880:
 - A. IS BASED ON THE NUMBER OF CPUs THE SYSTEM CAN HOLD AND IS SIMILARLY PRICED TO MICROSOFT'S DATA CENTER OS OR ADVANCED SERVER OS FOR INTEL-BASED SYSTEMS
 - B. IS FREE
 - C. IS A \$2,000 OPTION
8. THE TRUE PERFORMANCE OF THE V880 IN RUNNING A CUSTOMER APPLICATION CAN BE EVALUATED ON:
 - A. TESTS THAT FOCUS ON THE SPEED OF THE SYSTEM'S PROCESSOR
 - B. TESTS THAT MEASURE THE COMBINATION OF PROCESSOR SPEED, I/O BUS SPEED, DISK SPEED, ETC.
 - C. TPC-C RATINGS ALONE
9. WHAT ARE THE KEY APPLICATIONS COMMONLY USED WITH THE SUN ENTERPRISE 280R?
 - A. WEB SERVER, NETWORK MANAGEMENT, CACHE SERVER
 - B. APP SERVER, MAIL SERVER, DIRECTORY SERVER, FRONT-END DATABASE
 - C. COMPUTE FARM
 - D. ALL OF THE ABOVE
10. HOW DO WE COMPETE AGAINST WINTEL PENTIUM III-BASED SERVERS?
 - A. SUN SPARC/SOLARIS RELIABILITY, SCALABILITY, AVAILABILITY, SECURITY
 - B. SUN FIREPLANE INTERCONNECT OFFERING BALANCED THROUGHPUT ON I/O, CPU, AND MEMORY, LARGE CACHE (16 TIMES HIGHER) AND MEMORY SIZE (8 GB VS. 4-6 GB)
 - C. APPLICATION AVAILABILITY (12,000 APPLICATIONS TO CHOOSE FROM)
 - D. ALL OF THE ABOVE
11. WHICH SYSTEM COMPONENT IS NOT REDUNDANT ON THE SUN ENTERPRISE 280R?
 - A. CD-ROM
 - B. DISK DRIVES
 - C. POWER CORDS
 - D. POWER SUPPLIES
12. WHICH BEST DESCRIBES THE SUN ENTERPRISE 280R?
 - A. 2U (RACK UNITS) HIGH, WITH 8 ULTRASPARC III PROCESSORS
 - B. 8U HIGH, WITH 2 ULTRASPARC III PROCESSORS
 - C. 2U HIGH, WITH 4 ULTRASPARC III PROCESSORS
 - D. 4U HIGH, WITH 2 ULTRASPARC III PROCESSORS
13. WHAT IS NOT PART OF THE VALUE PROPOSITION FOR SUN ENTERPRISE 280R?
 - A. TOWER FORM FACTOR
 - B. ENTERPRISE CLASS
 - C. RACK-OPTIMIZED, ENTRY SERVER
 - D. HIGH PERFORMANCE
14. TO WHICH TYPE OF CUSTOMER WOULD YOU NOT RECOMMEND THE SUN ENTERPRISE 280R?
 - A. FINANCIAL INSTITUTION
 - B. SERVICE PROVIDER
 - C. TELCO CENTRAL OFFICE
 - D. RESEARCH INSTITUTE

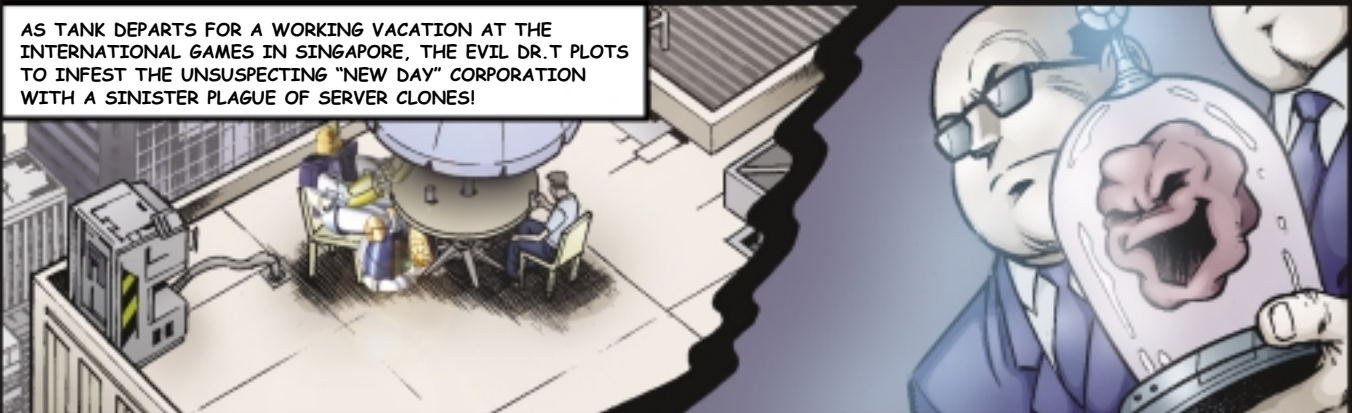

ONCE YOU'VE FIGURED OUT ALL THE ANSWERS, GO TO THIS URL:

[HTTP://WWW.SUN-VBOTS.COM/VOL2](http://www.sun-vbots.com/vol2)

AND TAKE THE TEST ONLINE. IF YOU PASS THE TEST, YOU WILL BE SENT A V-BOT COLLECTIBLE ITEM. IF YOU DON'T PASS THE TEST, STUDY UP AND TAKE IT AGAIN. ONCE YOU PASS, WE'LL SEND YOU YOUR COLLECTIBLE ITEM.

ANSWERS: 1(B) 2(A) 3(B) 4(A) 5(C) 6(A) 7(B) 8(B) 9(D) 10(D) 11(A) 12(D) 13(A) 14(C)

AS TANK DEPARTS FOR A WORKING VACATION AT THE INTERNATIONAL GAMES IN SINGAPORE, THE EVIL DR. T PLOTS TO INFEST THE UNSUSPECTING "NEW DAY" CORPORATION WITH A SINISTER PLAGUE OF SERVER CLONES!

Go to <http://www.sun-vbots.com/vol2>

SERIES and take the Sun Fire 280R and V880 quiz. Ace it and win fabulous prizes!

HANDY SALES TIP GUIDES

280R SALES TIP #1: SPARC/Solaris' performance and reliability at PC server prices.

SALES TIP #2: Sun Fire 280R offers significantly larger memory and cache configurations than Linux/Intel-based systems—16 times more cache and 33% more memory, which is perfect for memory and I/O-intensive applications.

SALES TIP #3: Remote management features are included at no extra cost.

SALES TIP #4: The 280R shares the same 64-bit SPARC/Solaris end-to-end architecture as all Sun systems, from single-processor servers to our largest enterprise servers. Proven technology with a clear roadmap to future generations.

SALES TIP #5: Sun Fire 280R has the same complete Solaris 8 OE as all Sun Fire servers, including the largest data center servers. The same application binaries run on all Sun Fire servers, including the 280R, reducing complexity and administration costs.

SALES TIP #6: Application alliances: Strong alliances with top-tier ISVs; 12,000+ Solaris applications.

V880 SALES TIP #1: IDC says that 75% of the volume server market wants "direct attached storage." The Sun Fire V880 has 437 GB of internal storage. Few 8-way servers have that kind of headroom. Focus on users whose need for direct attached storage is key.

SALES TIP #2: 64-bit performance at PC server pricing. Sell TCO. The Sun Fire V880 comes with the Solaris Operating Environment. There are no expensive OS license fees here and no expensive software migration requirements. Not so with MS on Intel.

SALES TIP #3: Sell application performance vs. benchmarks. The V880's balanced system design (i.e., Sun Fireplane Interconnect, CPU performance, memory bandwidth, I/O bandwidth, network bandwidth, and Solaris 8 system manager) allows for better application performance. High performance can mask poor total system application performances.

SALES TIP #4: For those looking forward to Itanium: Why wait? The Sun Fire V880 is based on proven SPARC and Solaris technology. It's available now.

SALES TIP #5: Sell savings and confidence. The midrange-like features of the Sun Fire V880 allow customers to save on their administrative time and overall cost by providing the confidence to consolidate applications onto a single, safe, and efficiently managed system.

SALES TIP #6: Sell safety. "No viruses here" is a big deal in mission-critical environments.
